DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 23, 2008 has been entered.

Election/Restrictions

2. Newly submitted claims 30-33 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the newly presented claims are directed to a method of using the bag not originally presented.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 30-33 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Specification

3. The amendment filed September 23, 2008 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: an opening "in the form of substantially parallel lips" on at least one of the opposite sides.

Applicant is required to cancel the new matter in the reply to this Office Action.

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: an opening "in the form of substantially parallel lips".

Claim Rejections - 35 USC § 112

5. Claims 13-16 and 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added claim limitation which is not supported by the original disclosure is as follows: an opening "in the form of substantially parallel lips" on at least one of the opposite sides. This is a ***new matter*** rejection.

6. Claims 13-16 and 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The lips are set forth in claim 1 on at least one side of the sealer. It is unclear how lips on one end of the sealer prevent liquid from passing through the lateral opening of the bag.

7. Claims 13-16 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how the lips on one side of the sealer holds the adjacent portions of the container such that liquid is prevented from passing through the (entire) lateral opening of the

container. Only the portion of the container where the lips engage the folded portion in the vicinity of the one end is held by the lips.

The location of the rod with respect to being fixedly attached to the container is not clearly set forth in claim 13. How is the opening accessible with the rod affixed thereto?

Response to Amendment

8. Applicant's declaration filed September 23, 2008 has been considered.

Allowable Subject Matter

9. Claims 13-16 and 19 appear to avoid the art of record. However in view of the rejection(s) under 35 U.S.C. 112, 1st and 2nd paragraphs set forth in this Office action, the claims are not deemed allowable at this time.

Response to Arguments

10. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

11. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F.R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
